Education

Master of Science in Computer Engineer
Centro Politécnico Superior (Universidad de Zaragoza), 2012
Zaragoza (Spain)

Master of Science in Computer Engineer: Master thesis
Centro Politécnico Superior (Universidad de Zaragoza), 2011 - 2012
Zaragoza (Spain)
Description: A Puppet extension to manage clouds, making the administration and configuration process of the clouds as easy and automatic as possible.
Grade: 9 (out of 10)

Master of Science in Computer Engineer: Erasmus programme
Kungliga Tekniska Högskolan, 2009 - 2010
Stockholm (Sweden)

Skills

Technical
- Programming languages: I love Ruby and C. Good programming skills in Java, SQL and Ada. Programming experience in Python and x86 assembly.
- Web development: Sinatra, HAML and ERB. HTML and a little bit of CSS also included.
- Markup languages: XML, YAML and LaTeX.
- Database management: Oracle and DB2.
- Operating Systems: Ubuntu, Debian, Windows XP and Windows 7.
- Linux administration skills: Bash.
- Virtualization / Cloud: VMware and KVM.
- Configuration management: Puppet.
- Revision control: Subversion and Git.

Natural languages
Spanish (Mother tongue), English (Level C2) and French(beginner).

Social
I have worked in various types of teams, from two to five members, during my Computer Engineer degree. In the Projects course (Software Engineering area) the team was considered the best among all of the teams that year. During my Erasmus programme I worked with people from very different nationalities and cultural backgrounds.

Artistic

I love playing the guitar, specially blues on the electric guitar, but from time to time I pick the spanish guitar to delight my friends with famous songs. I can also juggle up to three balls provided it is necessary.

Miscellaneous

I love reading books, running and travelling around the world.
